📍 Pune, Maharashtra 411057

SUMMARY

I am a professional software developer with expertise in creating efficient and scalable code using Java, React.js, and Node.js. I excel in team collaboration, adapting to evolving project requirements, and delivering impactful results. My skills encompass debugging, problem-solving, and maintaining effective communication with cross-functional teams. I pride myself on reliability and a proactive approach to achieving development goals

EXPERIENCE

Junior Software Developer– Intern

Ratna Services

📅 01/2022 - 01/2025 📍 Pune, India

A company providing software development and IT services

- Developed responsive and dynamic front-end interfaces using React.js and Material UI
- Implemented state management with React hooks to enhance performance and built reusable components
- Worked with Node.js and Express.js to build and integrate RESTful APIs
- Handled CRUD operations for real-time data and collaborated with the team to debug, test, and deploy features
- Gained hands-on experience in full-stack development, covering both UI/UX design and backend logic
- Optimized code readability and maintainability by utilizing best practices in coding standards and documentation

EDUCATION

B.E: Computer Science and Engineering

Anuradha College Of Engineering and Technology

📅 01/2021 - 01/2025 📍 Chikhli, India

HSC: Science

Vivekanand Jr. College

📅 01/2021 - 01/2021 📍 Hiwara Ashram, India

LANGUAGES

English

Native

Hindi

Native

TRAINING / COURSES

Java Full Stack Development – QSpiders, Wakad, Pune

Trained in Core Java, Advanced Java, JDBC, and SQL

SKILLS

Java React Node.js Core Java

Advanced Java JDBC SQL

Hibernate JPA RESTful API

PostgreSQL MongoDB HTML

CSS JavaScript Material UI

React Hooks Express.js REST

Eclipse Visual Studio Git

MySQL TensorFlow Python

Github Flask Keras OpenCV

PyCharm

PROJECTS

School Management System

📅 07/2025 - 10/2025 📍 Pune, India

Developed a scalable school management system using modular architecture, REST APIs, Java/Spring Boot, PostgreSQL, and React, with Git and Maven for DevOps efficiency.

- Built a multi-module school management platform using Java and REST APIs.
- Implemented attendance, report cards, library, lab, and parent-teacher communication features.
- Integrated MySQL/PostgreSQL and followed MVC architecture

Fashion Recommendations System

📅 12/2024 - 02/2025 📍 Location

Developed ML-based fashion recommendation system using Python, Flask, scikit-learn, MySQL, and React.

- Built a personalized recommendation system using Python, Flask, and scikit-learn.
- Implemented REST APIs with Flask and MySQL for user and product data.
- Developed a React frontend to display real-time recommendations.
- Used Git for version control and data preprocessing.
